Health, Safety, Risk Management & Prevention Software

THE PARKLANE SYSTEM:

When it comes to the health and safety of your employees, their data and the record of your due diligence—you need a system you can trust; one that keeps information organized, safe and all in one place.

Parklane's modular system allows you to choose from a variety of comprehensive, user-friendly modules that you can customize so your system is just right for your business.

It is because of years of dedication to our clients that you can be confident Parklane software will not only work for your business, but is easy to use and understand.

Our modular design saves you money

Modules

Incident Reporting/Claims
Incident and claim management including costs, types, causes, corrections, trends, electronic WSIB/WCB filing, electronic costs and hundreds of built in reports and graphs.

Disability Management
Manage your non-occupational claims including statistics, costs, days lost, STD & LTD tracking.

Recall
Record training requirements, immunizations & more. Report on compliance, & send mass due/overdue notices.

Work Accommodation
Organize your early and safe returns to work. Manage modified work cases, restrictions, assignments, customize RTW phases and report on program efficacy.

Risk Assessment
Reduce risk and track you workplace hazards & controls. Know which are outstanding, customize automated email notifications, and even manage your H&S policies.

SIMON
Outbreak preparedness: Prevent, track and manage outbreaks; mobile flu clinics, online self reporting of infectious illness.

Chart
Electronically detail visits to H&S department and monitor departmental activity.

Attendance and Absence
Monitor/track absences, occurrences and build custom support programs.

Audiometric
Keep the proper records and track results of your workers' exposure to noise over time.

Why do so many choose Parklane?

Intuitive
Parklane was developed as a comprehensive health and safety software system that is easy to use and makes sense to the user.

Diverse
Our modular system allows you to use only what you need and is diverse enough that it is utilized in a wide range of industries. Since 1987, Parklane Systems has partnered with hundreds of organizations to provide a cost effective software solution that supports the documentation and efficient management of employee health, safety and wellness.

Flexible
Parklane's table driven system empowers you to decide how you wish the Parklane system to collect, manage and track your data. Therefore, no matter what line of business, Parklane can be tailored to suit you. Not only is what you capture flexible, but how you report. We have multiple reporting options from built-in reports to spreadsheets with pre-built pivot tables and graphs and customizable exports.

Support
Parklane's team of experienced professionals are fully trained in all aspects of the system from functional support for the users, to the more technical. As a Parklane customer, you may call or email support as often as you wish.

Flexible and informative reporting
